

Reach! is a facilitator-led social game designed to enhance the physical, cognitive and social-emotional wellbeing of people in later years. It was developed by Ilaria Vilkelis, a Mission 3 Zinc Founder. This version was especially designed for residents of care homes to enhance their wellbeing and their social confidence.

Ilaria was supported by a team of specialists she wishes to acknowledge.

A heartfelt thank you to Jo Butler, Danielle Dunn and Andrew Green and the residents and staff of Ravenhurst, Sanctuary Care Home who pioneered the game. Thank you also to Anu Dhir, Marianna Recchia, Elena Bonn and the Zinc R&D team for their valuable support and guidance.
